WORDPRESS

Hooks, REST API, WP-CLI, Cron

FRONTEND

JavaScript, React, Next.js

PLATFORM

Docker, Git, Linux, Redis

SCALE

Elasticsearch, caching, CDN

ENGINEERING PRACTICE

SOLID and modular architecture | Secure coding | Query profiling | CI/CD workflows

WORKING STYLE

- Architecture ownership
- Production debugging
- Clear technical handoff
- Maintainable delivery

PROFESSIONAL EXPERIENCE

Krapton IT Consultancy

3 YEARS - PRESENT

WordPress & WooCommerce Developer

- Lead current WordPress and WooCommerce delivery across architecture, custom development, deployment, and production maintenance.
- Build modular PHP/OOP plugins and complex product, checkout, payment, order, and fulfillment workflows.
- Implement HPOS and optimize large datasets with custom tables, query tuning, caching, Elasticsearch, and WP-CLI.
- Integrate Next.js and third-party services through secure REST APIs while improving Core Web Vitals and production reliability.

Chetu Inc

2 YEARS

WordPress Developer

- Developed and maintained WordPress solutions using PHP, hooks, filters, custom functionality, and responsive frontend implementation.
- Supported theme and plugin customization, API integrations, debugging, performance improvements, and secure production maintenance.

SELECTED PROJECTS

01

Bonehorn Crafts
INTERNATIONAL ECOMMERCE
bonehorncrafts.com

Customized the catalog, product, cart, checkout, customer, and order experience; strengthened responsive delivery, structured data, SEO, and Core Web Vitals.

FOCUS
WooCommerce | Performance + SEO

02

MK Computers
HEADLESS COMMERCE
www.mkcomputer.in

Built the WooCommerce backend and API layer for a Next.js technology retail storefront, including HPOS and custom catalog, checkout, customer, and order logic.

FOCUS
Next.js + Woo REST API | HPOS

03

Eduglobetech
STUDENT MANAGEMENT
eduglobetech.com

Developed secure role-based profiles, application workflows, and custom dashboards for students and administrators, with database and technical SEO improvements.

FOCUS
Roles + dashboards | REST APIs

04

Healthcare Platform
HIGH-VOLUME OPERATIONS

Created diagnostic booking, billing, reporting, search, and admin workflows for an in-house system handling 60K-100K+ reports, orders, and related records.

FOCUS
Custom data + search | 60K-100K+

DELIVERY STRENGTHS

PERFORMANCE
Core Web Vitals
Caching + query tuning

SECURITY
Validation + nonces
Capabilities + access

OPERATIONS
WP-CLI + Docker
Git + Linux workflows
